

Nevron Data Visualization technology for Microsoft SharePoint 2007 and 2010 (MOSS and WSS) is designed to provide exceptional reporting and dashboarding features to SharePoint users and IT Professionals. The web parts included in the suite are configured visually and directly in SharePoint environment, through an exhaustive web-based interface.

The web parts can connect to a diverse range of data sources including: databases, SP Lists, BDC and Excel Services. The web parts are equipped with a fast, reliable and flexible data aggregation engine, which allows the authoring of complex dashboards that perform sophisticated data analysis. This, combined with the presentation quality and rich feature set that only Nevron provides makes these web parts unmatched.

Nevron SharePoint Vision is a turn-key solution for every SharePoint user that wants to create advanced digital dashboards and reports in SharePoint - quickly, on budget and on time.

Nevron Chart for SharePoint

Nevron Chart for SharePoint is an advanced web part, which delivers a complete set of 2D and 3D charting types, highly customizable axes, multiple charting areas, legends and titles and a full range of enterprise charting features that are driven by pivot data aggregation. This allows the creation of complex pivot charts to be done visually and directly in SharePoint environment.

Nevron Gauge for SharePoint

Nevron Gauge for SharePoint is an advanced web part, which delivers a complete set of radial and linear gauges, numeric displays and state indicators which are driven by pivot data aggregation. This allows the creation of complex gauges that are tightly integrated with your data to be done visually and directly in SharePoint environment.

The leading suite of data visualization web parts for SharePoint 2007 and 2010
